Rapid Response® Multi-Drug Flat Test Cup

(Urine)

DRUG SCREENING

The Rapid Response® Multi-Drug Flat Cup is an easy-to-use, one-step drug screening solution that can simultaneously detect multiple drugs in urine samples. It is compatible with The RapidReader App, allowing you to upload results to your ATS/ EMR/EHR in seconds without the paperwork.

Features

- Leak-proof cap for mess-free testing
- Peelable label ensure confidentiality and privacy
- Built-in temperature strip to detect sample adulteration

Product Details

Sample: Urine
Format: Cup
Time-to-Result: 5 minutes
Storage Condition: 36-86°F/2-30°C
Test Principle: Lateral Flow Assay

Kit Content

- Individually packaged test cups
- Adulteration color chart (when applicable)
- Product insert
- Security seals

Compatible with The RapidReader App

Streamline your drug screening process by alleviating the burden of physical paperwork and manual inputs. The RapidReader App is a reliable solution to support users with results collection, reporting, and upload directly from any mobile device.

Multi-Drug Flat Test Cup

Testing Procedure

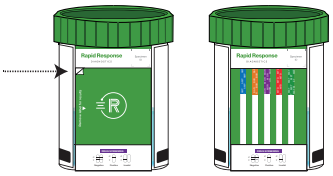
1

Collect the sample in the cup, then screw the cap onto the cup.

2

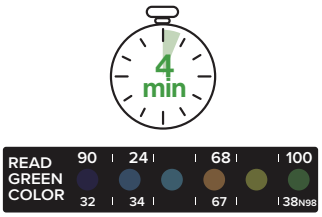
Date and initial the body label. Check the cap for tightness.

3



Remove the peel-off label.

4

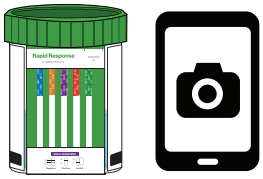


Check the temperature strip at 2-4 minutes after specimen collection.

5

After 5 minutes, peel the label off and read the results.

6

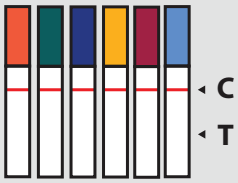


OPTIONAL: Take a photo of the cup to auto upload confirmed results to your ATS, EMR or data management system.

These instructions are for illustrative purposes only. Please read the instructions supplied with the test before use.

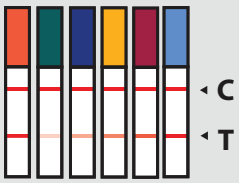
Result Interpretation

Positive/Non-Negative



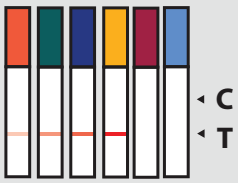
Only one colored band appears in the control region (C). No apparent colored band appears in the test region (T).

Negative



Two colored bands appear on the membrane. One band appears in the control (C) and another appears in the test region (T).

Invalid



No line appears in the control (C). The result is invalid.
