

Rapid Response™

SPIKED DRINK TEST KITS

HARM REDUCTION IS PREVENTION.

Empower students to check drinks for GHB (a common drug used in drink spiking) with BTNX's drug checking test kits.

BTNX's Rapid Response™ Spiked Drink Tests integrates with your existing harm reduction efforts, support safer socializing and informed choices at parties, bars, and campus events.

- ★ Size of a credit card! Fits in wallets, bags or the back of a phone case so your students are ready to test.
- ★ Detect GHB in seconds.
- ★ Discreet and easy to use.
- ★ Tear or fold the card to create four individual, smaller cards for even more discreet testing and sharing.

What is GHB?

GHB is a clear, odorless liquid often slipped into drinks to incapacitate someone by causing rapid sedation, memory loss, and unconsciousness, making them vulnerable.

Empowering Consent Education & Campus Policy.

Create a community where students feel connected, safe, supported, and able to thrive.

Campus health and wellness centers are pillars of student safety. Support student life and well-being goals by promoting informed decision-making, risk awareness, and student autonomy.

- ★ Strengthen campus-wide efforts by raising awareness of drug-facilitated assaults, how to identify and respond to drink spiking.
- ★ Encourage reporting, reinforce accountability, and provide students with tools that support real-world safety.
- ★ Support prevention strategies that align with your campus Sexual Misconduct and Title IX policies.
- ★ Integrates into response protocols, education and outreach initiatives, Harm reduction programs, and Sexual Assault Evidence Collection Kits.

Spiked Drink Testing

Campus drink testing programs empower students to discreetly test their beverages in social settings, serving as both a preventative measure and a deterrent to potential perpetrators by increasing their perceived risk of being caught.

Rapid Response™ Spiked Drink Test

REF: GHB-8CD158-2

PACK SIZE: 2 Test cards (4 tests per card).

DETAILS: Detects GHB in 60 seconds.
Dip your finger in your drink and blot it on a test pad to run the test.
