

REF DX.X-1V

Rapid Response™ Multi-Drug One Step Cup

(Urine)

DRUG SCREENING

The Rapid Response™ One Step Cup is an easy-to-use, one step drug screening solution that can simultaneously detect multiple drugs in urine samples. This format is a great alternative to the industry's complicated testing processes and is available with and without adulterant tests.

Kit Content

- Individually packaged test cups with integrated drug test panels and caps
- Adulteration color chart (when applicable)
- Product insert
- Security seals

Product Details

Sample: Urine

Format: Cup

Time-to-Result: 5 minutes

Storage Condition: 36-86°F/2-30°C

Test Principle: Lateral Flow Assay

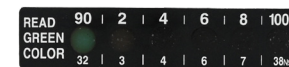

Features

- Results in just 5 minutes
- No direct contact with the sample required
- Available with a wide range of parameters and adulteration test combinations
- Integrated procedural controls for each parameter

Leak proof cap ensures no mess

Peelable label ensure confidentiality and privacy

Integrated temperature strip to detect sample adulteration

REF DX.X-1V

Multi-Drug One Step Cup

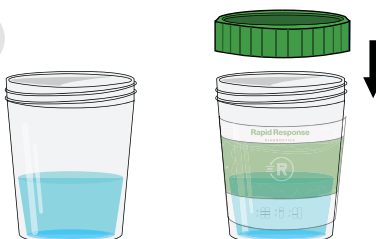

Testing Procedure

- 1**

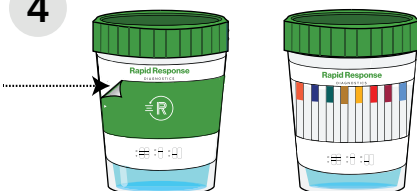

Unscrew the cap from the cup.
- 2**

Collect the sample in the cup, then screw the cap onto the cup.
- 3**

Immediately start the timer for 5 minutes.
- 4**

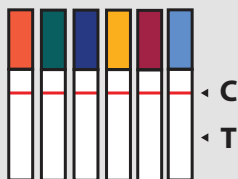

After 5 minutes, peel the sticker off and read the results.

These instructions are for illustrative purposes only. Please read the instructions supplied with the test before use.

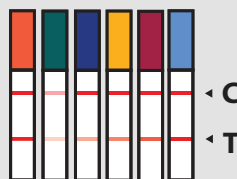

Result Interpretation

Positive/Non-Negative

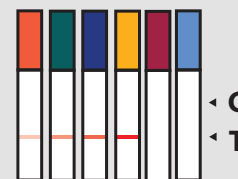

Only one colored band appears in the control region (C). No apparent colored band appears in the test region (T).

Negative

Two colored bands appear on the membrane. One band appears in the control region (C) and another appears in the test region (T).

Invalid

No line appears in the control region (C). The result is invalid.
